Experience

Mar. 2022 – Aug. 2022. **Test Automation Framework Intern**

Bluescape

I was tasked with writing, editing, and reviewing tests for the Bluescape front end. I worked exclusively in **JS** and gained great work experience with Jira, Testrails, and Github deployments.

Sep. 2021 – Dec. 2021. **Intro to OOP Teaching Assistant**

CSDS 132 is taught by Professor Harold Connamacher and centers around labs and projects in **Java**. As a TA I hold 2 sections of labs every week, grade projects, and have weekly office hours.

Jan. 2021 – May. 2021. **Mobile Development Intern**

GXC, LLC

Designed, implemented, and tested features for the unfinished **Flutter** based GXC mobile app under the mentorship of senior developers in the company.

Education

2022. **Case Western Reserve University** *Cleveland – Ohio*

B.A. in Computer Sciences GPA - 3.82

2021. **Yonsei University** *Seoul – S. Korea*

Exchange Student Academic Year: Fall and Spring Semesters.

2017. **Stuyvesant H** *NY – NY*

Projects

Spider. := A decentralized, encrypted messenger made with Cameron Farmer for Computer Security. Built using **Svelte** & **GunDB**.

WeightPlanner App := two separate projects: a **Flutter** app and a **Flask** python web app. Tracks workouts with hive for flutter and a csv for flask. WeightPlanner Flask

DigitalButler := A **Flutter** project from SW engineering course at Yonsei. Translates text from pictures, saves photos and locations, Designed to help remember restaurants and translate menus.

GoJitsu := I web scraped Jiu Jitsu competition data using **Go** and using the resulting CSV I performed analysis with **R**. Cleaning, tidying, plotting, and creating basic models of the data.
